

DATA SHEET

ES 466 SERIES IP66 RATED RACKMOUNT Wall Cabinets

A new addition to the Canford range of wall mount cabinets, designed for use in outdoor open areas subject to the full force of the elements or harsh internal environments such as chemical plants or marine applications.

Manufactured in steel, offering sealing to IP66, the ES466 series are available in three heights, two widths, three depths and three finishes. Finishes are Light grey, RAL 7035, powder coat, AISI 304 pre-grained stainless steel and AISI 316L pre-grained stainless steel. All units have a full steel, lockable front door offering both 130 degree opening and left or right operation. Rack profiles are recessed 50mm or 100mm from the front depending on the model (Note: no rear mounting profiles are supplied with this series of cabinets). Cable access is available on the base of the painted cabinets and these are supplied complete with one cover plate and polyethylene gasket to maintain IP66 sealing.

FEATURES

- Rated to IP66 against water and dust ingress
- Fully welded construction for strength and rigidity
- Fully sealed and lockable steel door
- Full and half rack versions available
- 8U, 12U & 16U heights available
- 210mm, 300mm & 400mm depths available
- Supplied with a fitted steel front door; complete with gasket
- Rack profiles recessed from front 50mm or 100mm depending on model
